## Amputee Rehabilitation

Amputee Rehabilitation interventions are designed to improve function and quality of life after either a traumatic or non-traumatic limb loss. The therapists will work one-on-one with individuals to restore functional mobility and help patients adjust to life with their prosthetic limb.

Therapists are dedicated to helping individuals in collaboration with prosthetists to achieve their personal goals, regain their independence, and reach their highest potential.

Amputee Rehabilitation Services include:

- Physical therapy that focuses on improving strength, coordination, balance, and functional mobility
- Pre-prosthetic preparation and prosthetic training
- Wheelchair training
- Aquatic therapy
- Patient Education
- Personalized Treatment Plans
